EU RoHS II (2011/65/EU, 2015/863/EU)

The **RoHS 2 Directive 2011/65/EU** has been extended by the **Directive 2015/863/EU**, adding four further restricted substances and is effective since 22.07.2019. Wainwright Instruments GmbH hereby confirms that all our products comply with this directive, with the exception of brass housing components, which fall under the exemption of **Directive 2018/741/EU (Annex III, 6c, Category 11)**. According to this directive, we may continue to use brass with a mass content of up to 4% lead. Our products do not require RoHS labelling.

Terence Wainwright
(Managing Director)
